

Ash Technologies Opti Lite

£1195.00

Description

The OPTi Lite is a highly portable and robust, full colour electronic magnifier. It is extremely easy to set up and use, offering a broad range of capabilities from handwriting through to craftwork. Designed around the very successful Prima unit, it has a proven pedigree in the global low vision market.

Features:

- Easy to use software interface
- Full colour
- Positive, negative and semi-colour modes
- Variable screen size and position
- View manager with up to ten saved screen options
- Lock / Unlock aspect ratio
- Variable toolbar position and size
- Manual focus control

Benefits

The OPTi Lite is perfect for people on the move. Great for reading and writing; large magnification range; X/Y style reading platform; folds flat and can easily fit into a shoulder bag or small rucksack.

Battery Life

Up to 10 hours

The OPTi Software Interface

Please note!

The OPTi has very specific host computer requirements. These are:

Operating System:

- Microsoft Windows XP with Service Pack 2

Hardware:

- Intel Celeron 2.0 GHz(absolute minimum)
- AMD Athlon XP 2400+ or higher
- Intel Pentium IV 1.6 GHz or higher (recommended)
- 32 MB of video RAM minimum with 64 or greater recommended
- 480 MB system RAM minimum
- Motherboard must has USB 2.0 capability as OPTi is not compatible with USB 1.1 (A PCMCIA USB 2.0 card is available)
