

## **Tagarno Viper - NEW!**

**£2295.00**

### **Description**

**Don't worry about finding an electrical outlet. Don't worry about the status of the battery. Just focus on the task at hand. The Viper does not have a battery - or a transformer, thus making it much lighter to carry. All you need are two spare USB ports on your laptop or PC!**

Viper is the new portable magnifier from TAGARNO. It is designed as a school or workplace solution.

Unfold the unit, plug it into your laptop and you are ready in less than half a minute - no tools needed, no assembly or disassembly! Text reading and distance viewing is achieved utilizing one camera only.

The elegant Danish design ensures seamless integration anywhere.

### **Who is the Viper for?**

The Viper is the perfect choice for users requiring the power of a desktop CCTV on the go. Anyone in education will appreciate its lightweight construction and extremely fast setup time with the power to both read text-books and handwriting or use the camera for distance viewing to see the white board or projector screen. Its portability and image quality offer the same advantages to business users who work from more than one location.

## Key Features:

- Extremely easy and fast to set up
- Integrates with ZoomText, and Lunar magnification software
- Broad magnification range from 2-25X
- All functions (such as zoom, light, contrast and colours) are accessed by shortcut keys on the laptop keyboard
- Compatible with both Windows XP and Windows Vista
- Integrated LED light source can be activated if necessary
- Very lightweight at just 1.4 Kg (3 lbs)
- Cushioned carrying bag is included
