

Rehan Electronics Looky - NEW!

£420.00

Description

A small, electronic handheld magnifier weighing only 200 grams, the Looky is the lightest device of its kind. It is so handy that you can carry it easily in your breast pocket.

Features

Always a clear view

With the Looky, the picture is always sharp and you can read the text perfectly. You can see the text in colour, but also switch to black on white or white on black modes depending upon your preference.

Folding Handle

In contrast to other electronic handheld magnifier, the Looky comes complete with an ergonomically designed folding handle. This is designed to enable the user hold the

Looky in a comfortable way. Alternatively if the handle is not your liking, just fold it away.

Special freeze function

The Looky is equipped with a freeze frame function. This enables the user to push a knob to freeze the text or picture on the LCD screen, it as simple as taking a photograph. You can do this for example in the supermarket when you are not able to read the price of a product on the top shelf, you hold the Looky up in front of it, push on the knob and afterwards you can check the price with ease. You even have the possibility to switch between colour, black/white or white/black. It is all possible with the Looky.

Hand writing position

With the Looky it is easy to write your signature or make short notes. You can place the handle in a special position and look while you write. This is unique.

Batteries: easy to use

The Looky is provided with normal rechargeable batteries. As changing batteries can be often cumbersome, we have ensured that the batteries only fit the one way, you do not have to pay attention to the + and -. You will also receive a battery-charger with the Looky, so you can charge the batteries in the Looky easily and quickly. After charging the batteries, you can use the Looky for up to one and a half hours continuously. For extended use, you can even use normal batteries.
