

# Traveller+

Portable video magnifier

## **Powerful magnification at work, at school and on the move**

The Traveller+ is a full colour, battery powered, portable video magnifier designed for people on the move. The colour TFT flat screen magnifies text and pictures up to 16 times, using a stepless motorised zoom. The screen can be adjusted for an optimum reading position.

The Traveller+ features an integrated facility to assist you with writing or making notes. Above all, the screen, the rechargeable batteries and the writing facility are all built-in and make the Traveller+ truly portable.

## Specifications of the Traveller+

|                       |  |

| <b>CE, UL</b>         | Approved                                       |

## Traveller+, all in one hand

The tilting screen of the Traveller+ eliminates glare and light reflections and provides an optimum reading position, enabling you to use the Traveller+ in all sorts of light conditions. Large, easy to control buttons operate the motorised zoom allowing you to set any magnification from 4-16 times.

To assist you with writing, taking notes or viewing objects, simply adjust the Traveller+ to the standing position, so that the camera is pointing towards the working area. For poor lighting conditions, the built-in supplementary lights make reading and writing much easier.

Optional accessories include a car charger adapter and a TV display cable, should you wish to benefit from using a larger screen.
